USING E-COMMERCE WEBSITE,
USING PRODUCT SEARCH,
AND CONNECTING IT
TO XAMPP SERVER FOR
INVENTORY MANAGEMENT

INDEX

Minimum System Requirements.....	3
Objectives (To be able to run the website).....	3
XAMPP Server Setup	4-12
Database setup	13-22
Base database	13-18
Changing inventory values	19-22
Website setup	23-28
Navigating website	29-36
Searching	37
Navigating website	38-39
Contact Us Page	40-42
About Us page	43-4

Minimum System Requirements

- 2GB ram
- 1.2 GHz processor
- Intel i5
- Windows XP/7/8/8.1/10/11

*64 bit OS is preferred

Objectives

- XAMPP server needs to be running
- The website files need to be put inside the Xampp server
- The database has to be setup inside the Xampp server

XAMPP Server setup

1. After extracting the zip file, open the folder ‘xampp setup’
2. According to your PC version, open the appropriate setup file.

The top one for 32 bit PC(older PCs) or the bottom one for 64 bit PC(newer PCs).

Name	Status	Date modified	Type	Size
xampp-portable-win32-7.3.2-0-VC15-installer.exe	✓	27-05-2023 19:38	Application	1,06,662 KB
xampp-windows-x64-8.0.28-0-VS16-installer.exe	✓	27-05-2023 19:39	Application	1,46,776 KB

Note: If you want to find out whether your PC is 32 bit or 64 bit follow these steps:

- Select the Start button, then select Settings > System > About . Open About settings.
- At the right, under Device specifications, see System type.

3. Alternatively you can follow these links to obtain the setup files:

32 bit-

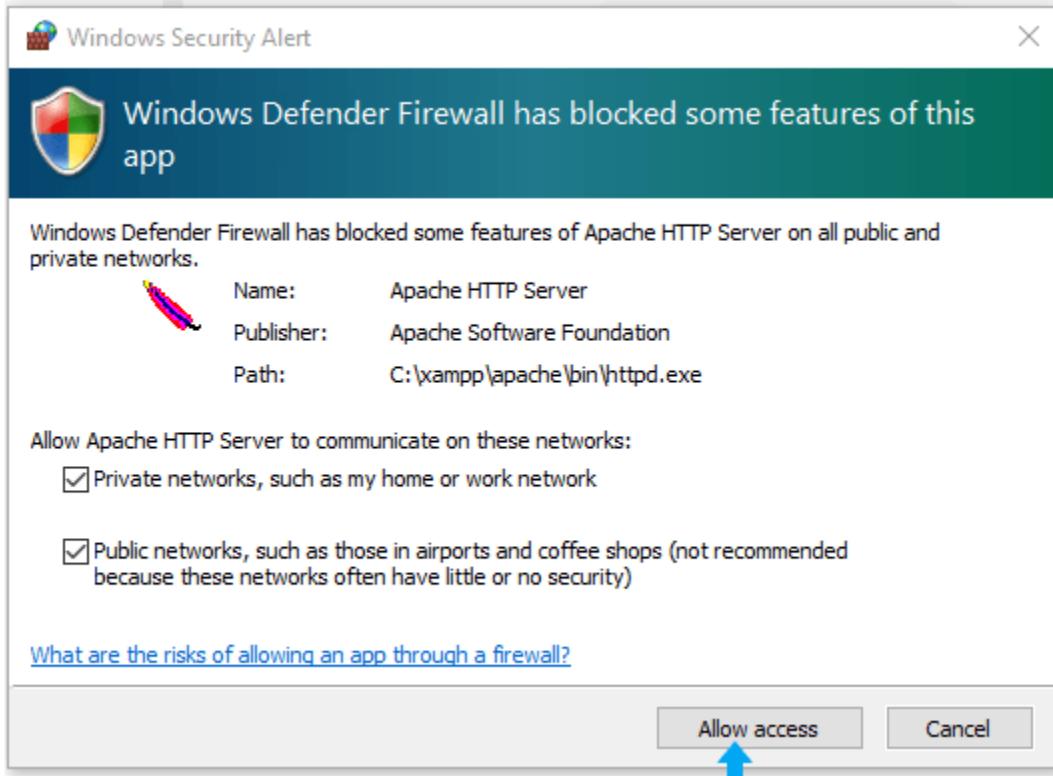

[Download xampp-portable-win32-7.3.2-0-VC15-installer.exe \(XAMPP\)](#)

64 bit-

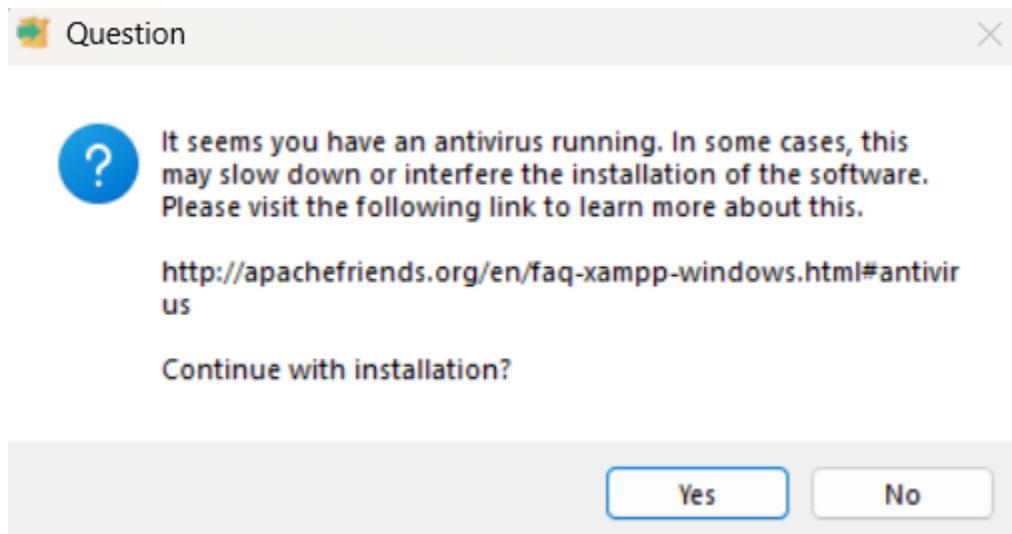

[Download xampp-windows-x64-8.0.28-0-VS16-installer.exe \(XAMPP\)](#)

4. Follow the prompts to install the system,

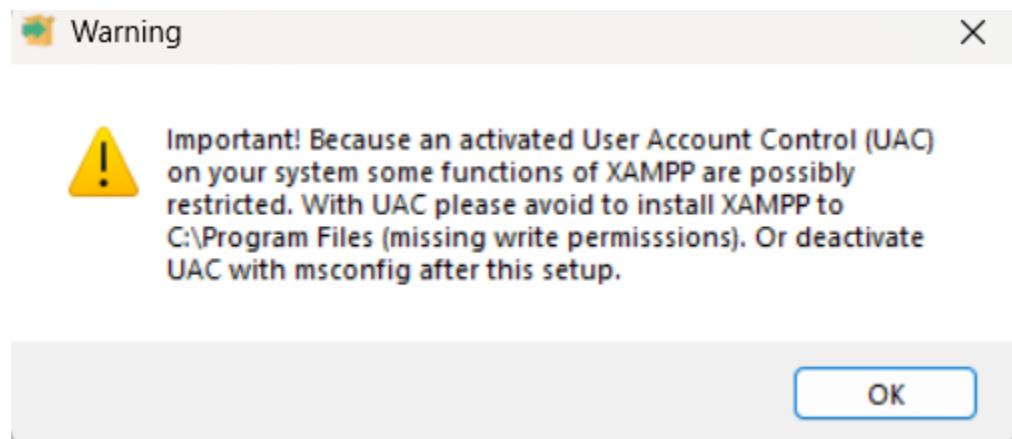

Note: The following pop-ups might show up while installing:

Allow access to both Private and Public networks by ticking both the checkboxes and click 'Allow access'

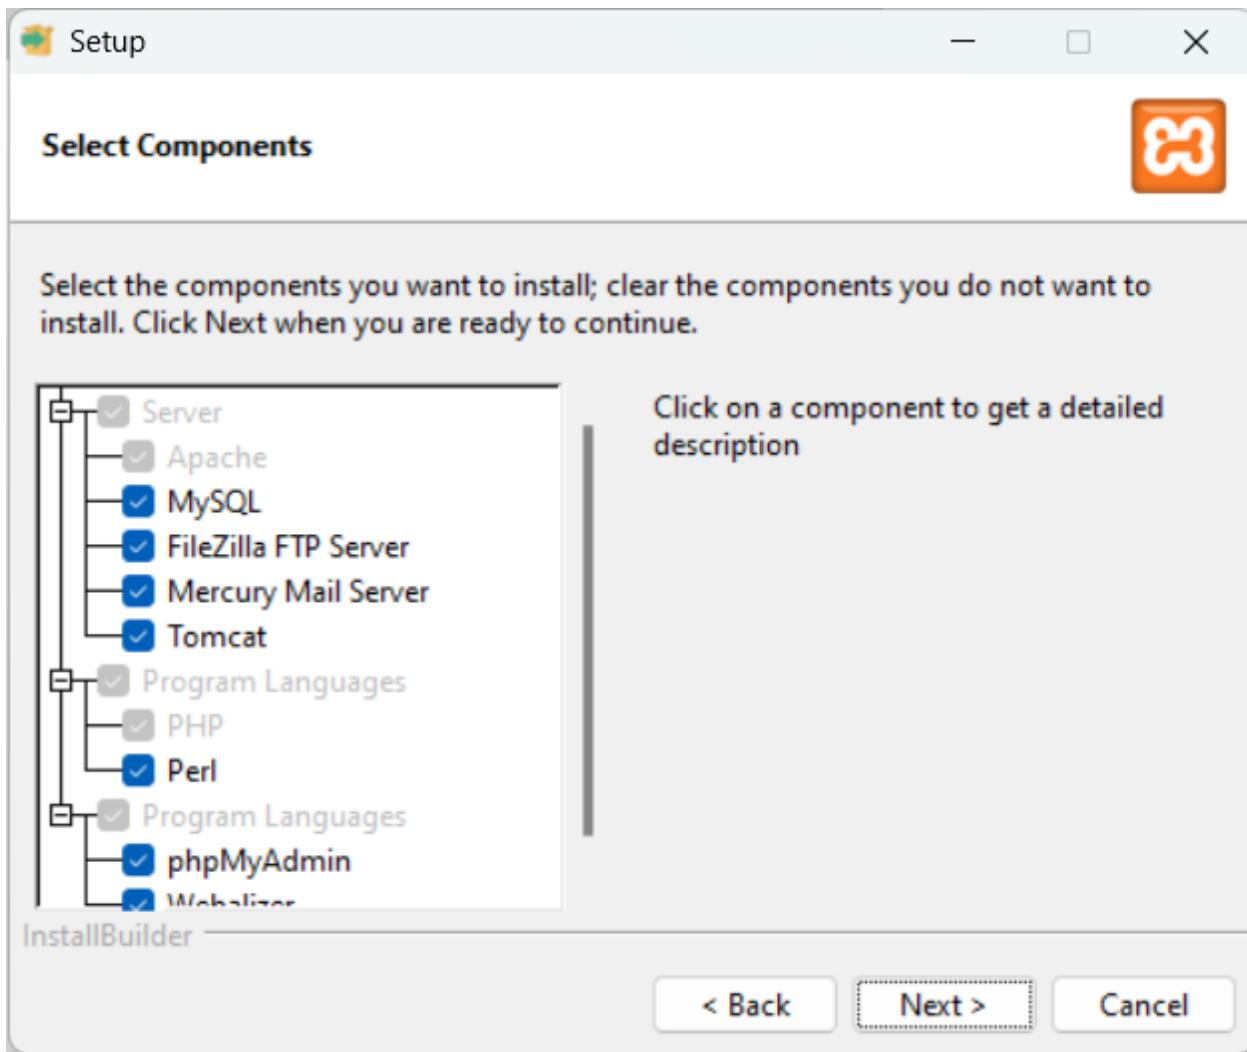

Click ‘Yes’, what we are doing isn’t very RAM intensive so slowing down shouldn’t be a problem. The antivirus prohibiting installation however is one, which you have to decide on how to proceed at your discretion.

For the website’s functioning this shouldn’t be an issue. If you want to use Xampp for your own use and want to solve this problem this link might help:

 [How to install Xampp and Solve UAC problem](#)

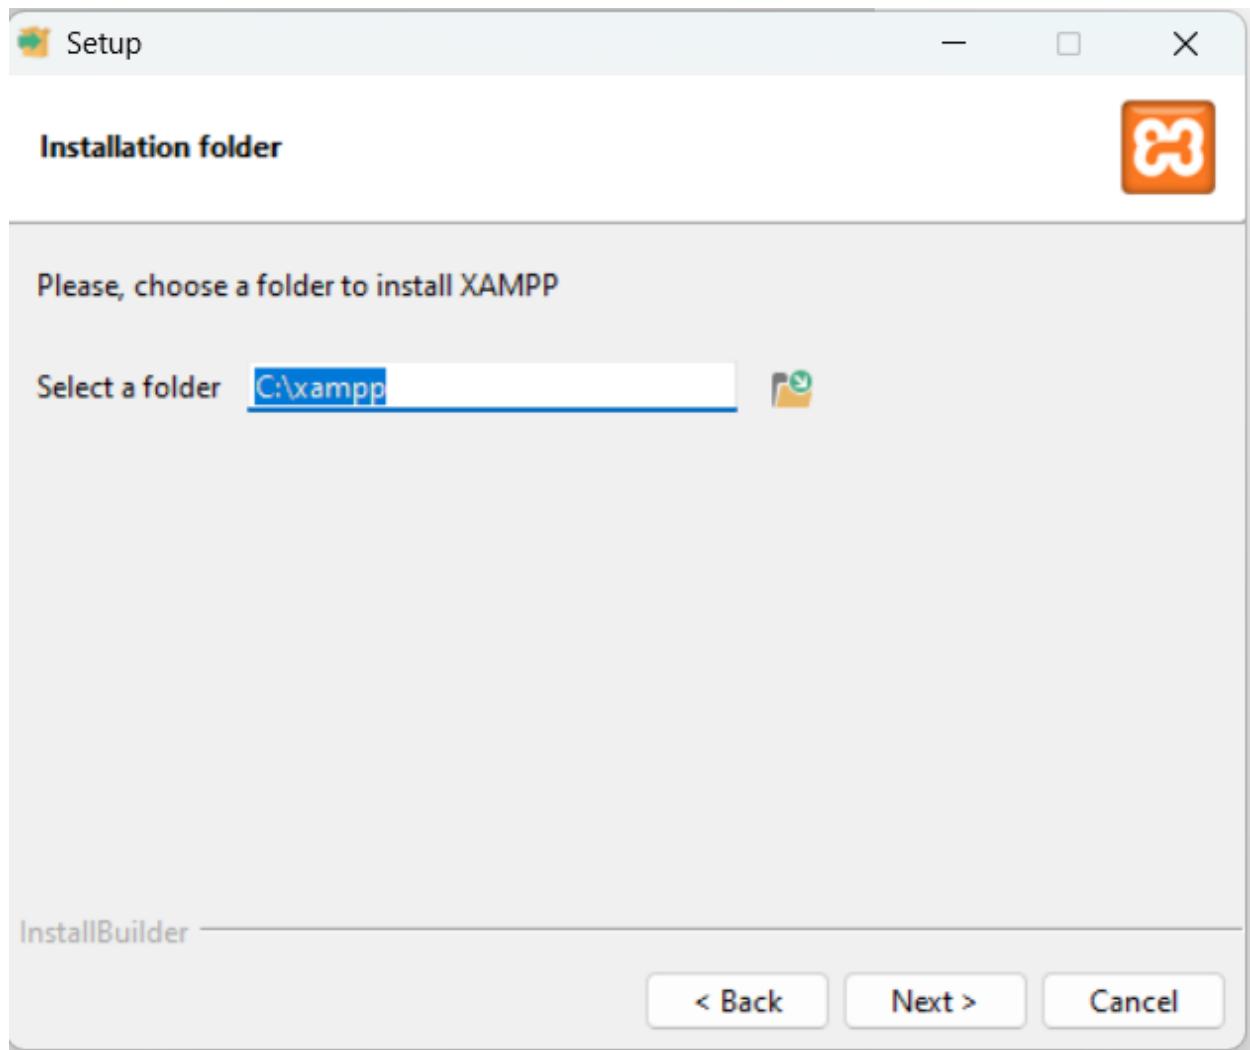

5. When the following prompt appears:

Make sure phpMyAdmin and MySQL are selected.

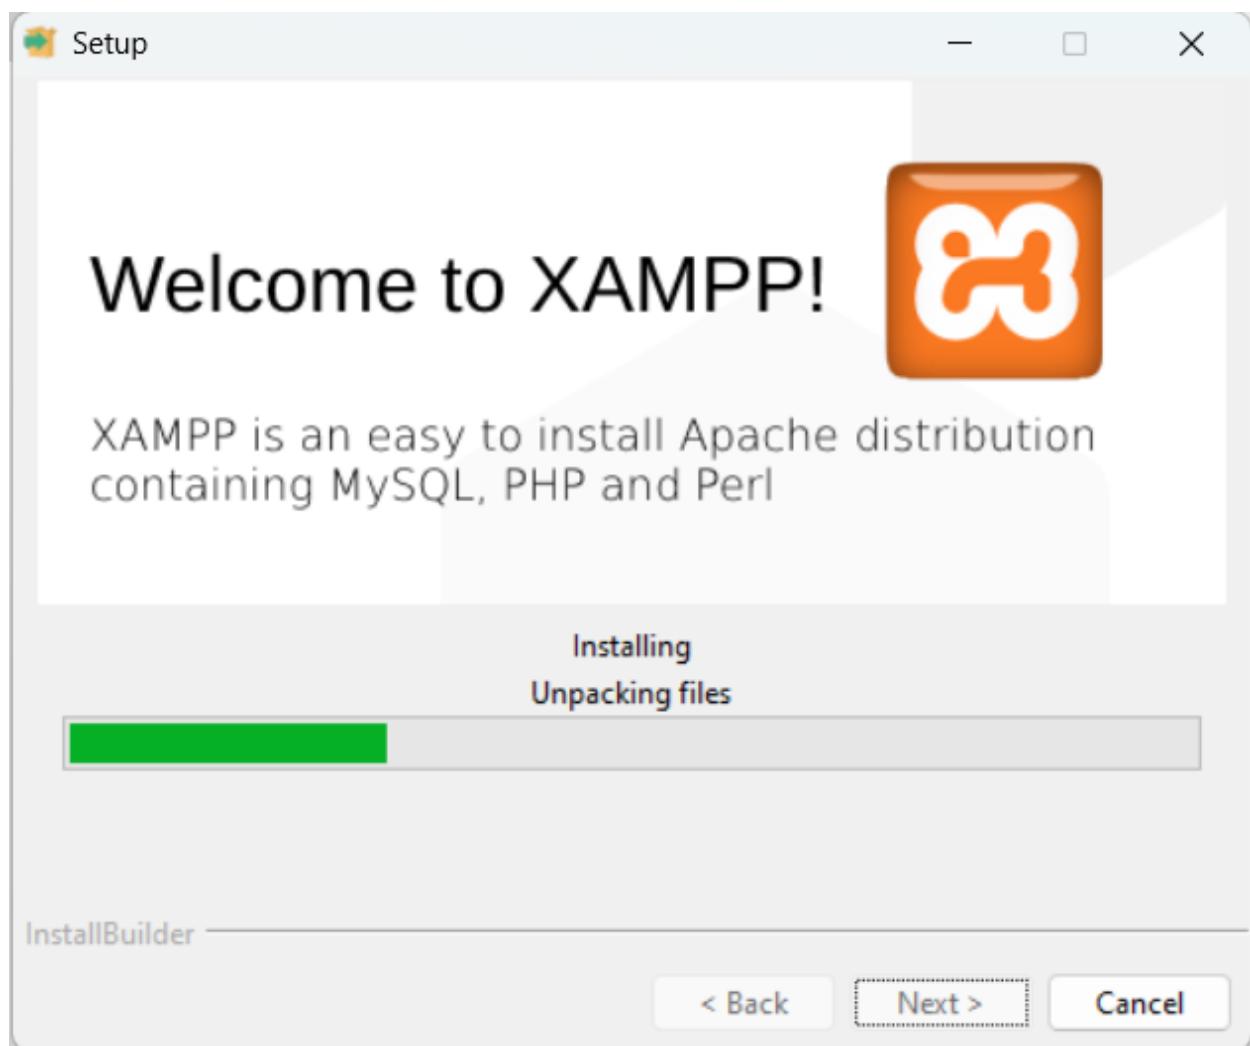

Leaving everything else selected is also fine as they don't take space until you open them.

6. When the Installation folder prompt appears, you can leave it as it is, however if you do decide to change it, do note down the location as it is important while activating the website and uploading the database.

7. Keep going through basic prompts like selecting the language according to your preferences.

The following is the longest part where the files are installed, this may take upto 10 minutes.

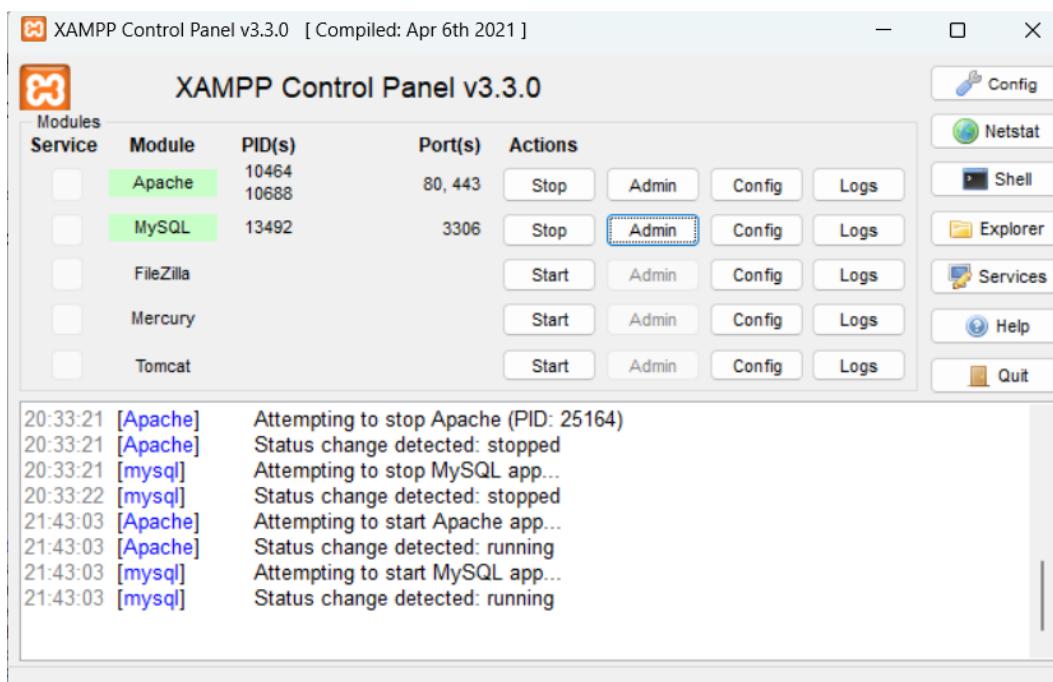

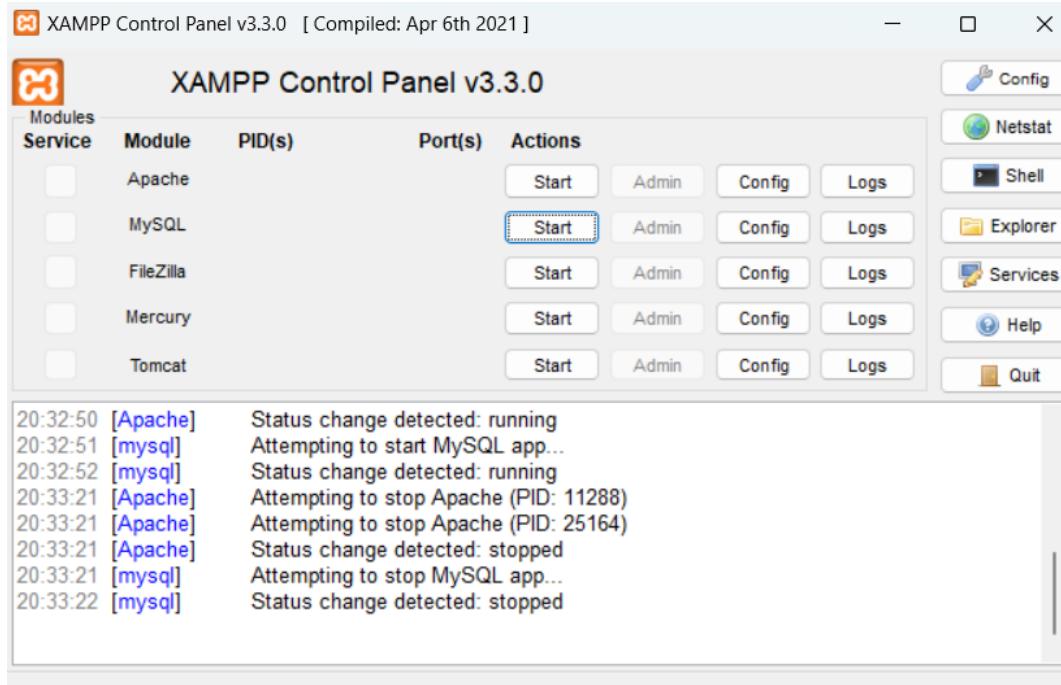

8. After finishing installation you can open the XAMPP Control Panel to ensure whether it is working or not.

You can find it in the xampp folder location(where you saved it, automatically in C:\xampp) as ‘xampp-control’.

Total 3.21 MB

9. Click ‘**Start**’ on both the Apache module and MySQL module, and then click on ‘**Admin**’ under MySQL module.

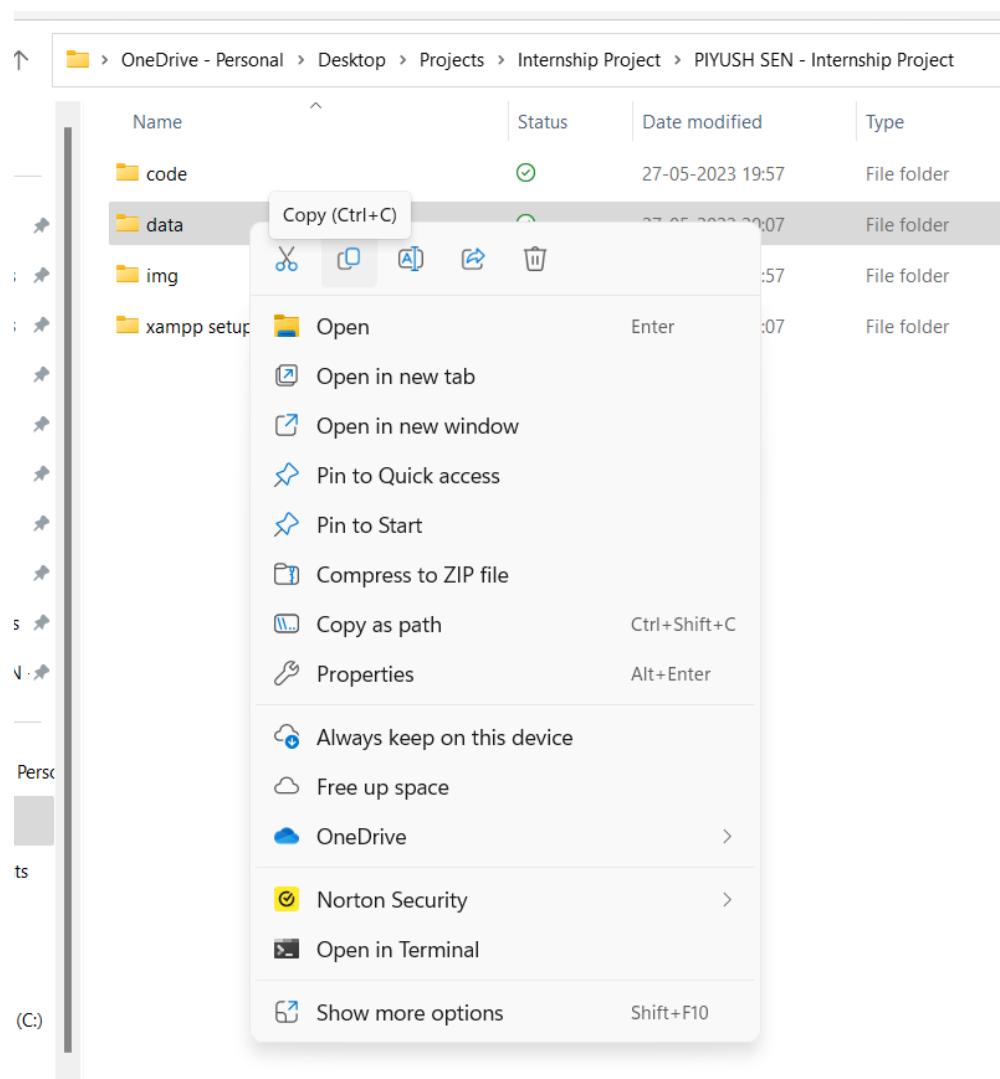

10. The following window should appear.
This means the installation was a success.

Databases Setup

Make sure the Apache and MySQL module are switched off during the database setup

1. Open the Project folder and copy the data folder.

2. Navigate to the xampp folder (where xampp was installed, (automatically in C:\xampp)) and open the folder ‘mysql’.

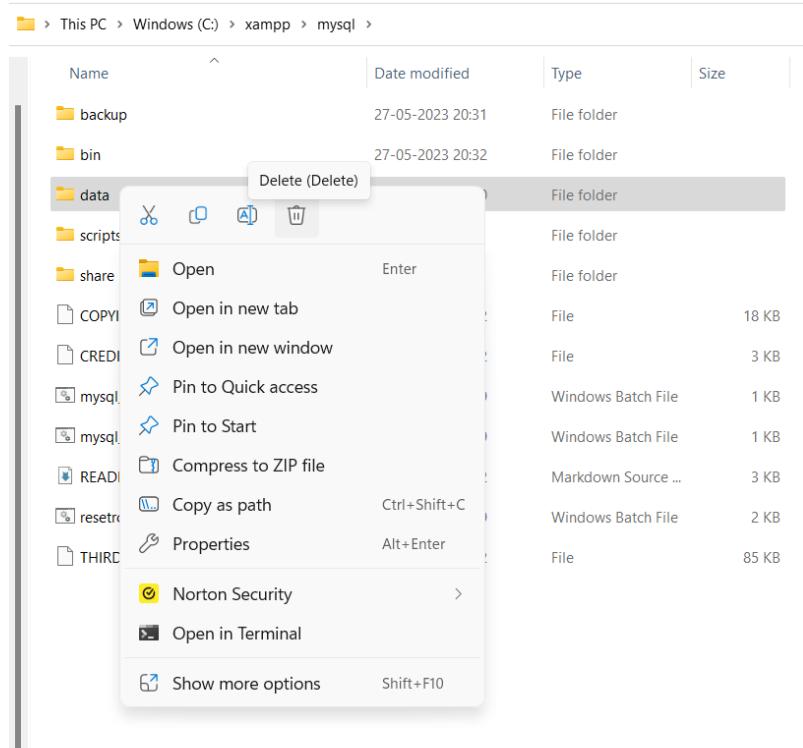

▶ > This PC > Windows (C:) > xampp >

4. Now, paste the folder you had copied earlier.

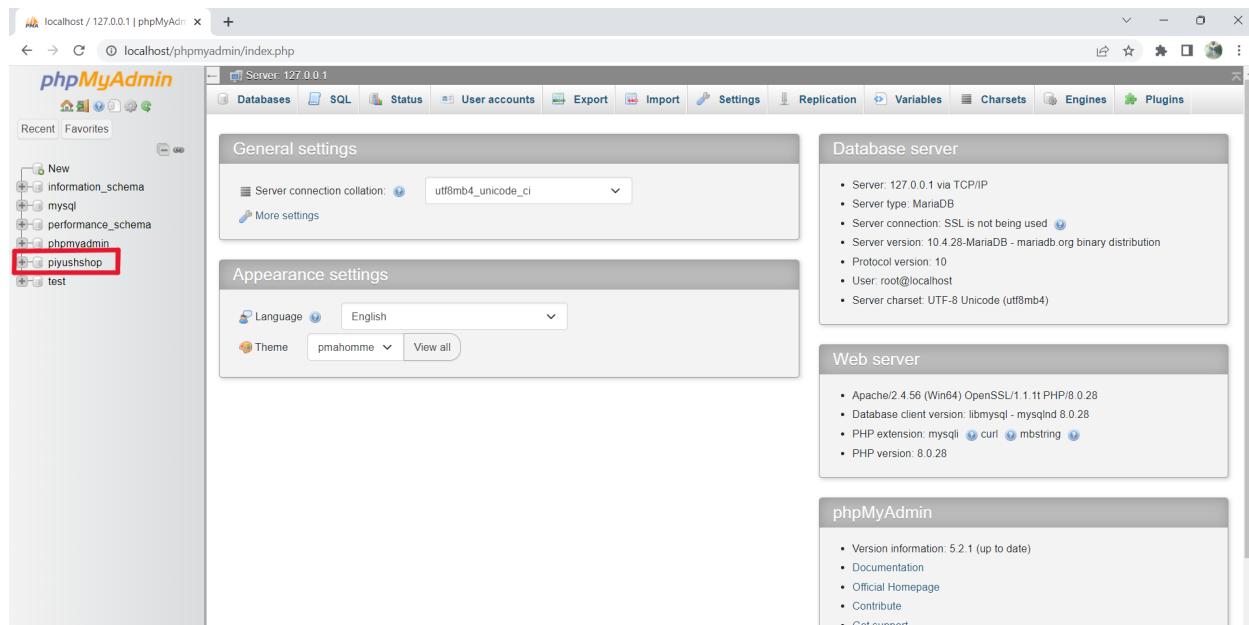

The databases should now be updated.

You can check it by opening phpMyAdmin
 Start xampp control panel and Start both Apache module
 and MySQL module.

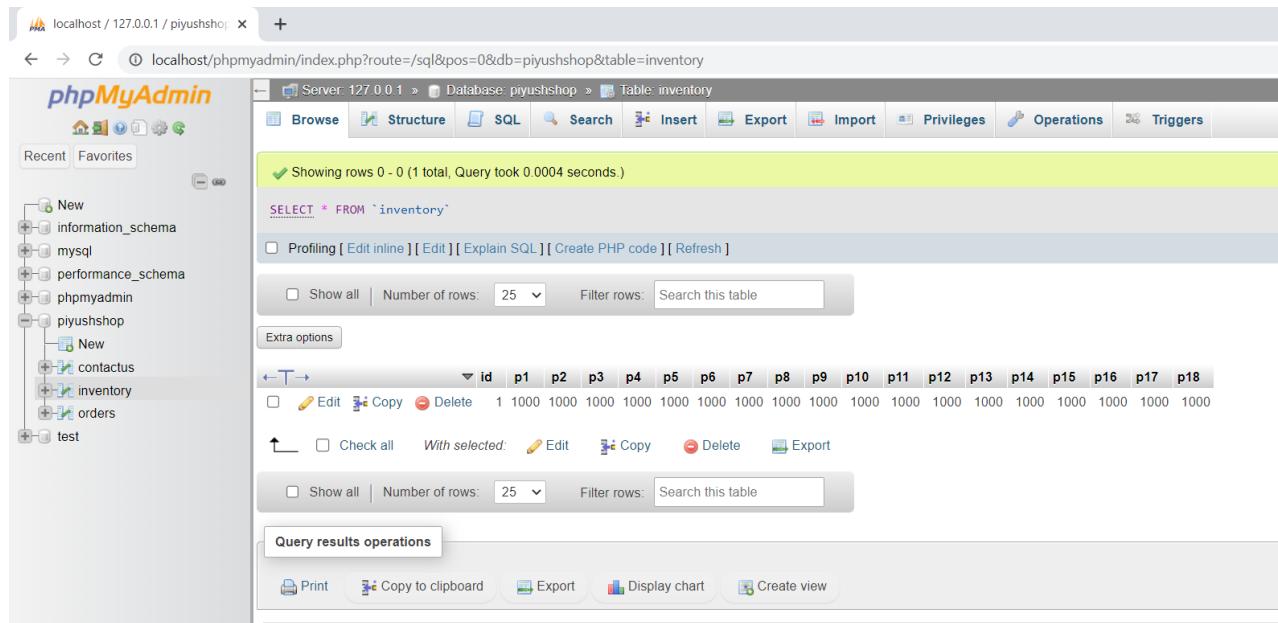

Then Press '**Admin**' under MySQL or open the following link:

<http://localhost/phpmyadmin/index.php>

The screenshot shows the phpMyAdmin interface on a Windows 7 desktop. The title bar says "localhost / 127.0.0.1 | phpMyAdmin". The left sidebar lists databases: New, information_schema, mysql, performance_schema, phpmyadmin, **piyushshop**, and test. The main content area has four panels: "General settings" (Server connection collation: utf8mb4_unicode_ci), "Database server" (Server: 127.0.0.1 via TCP/IP, Server type: MariaDB, Server connection: SSL is not being used, Server version: 10.4.28-MariaDB - mariadb.org binary distribution, Protocol version: 10, User: root@localhost, Server charset: UTF-8 Unicode (utf8mb4)), "Appearance settings" (Language: English, Theme: pmahomme), and "Web server" (Apache/2.4.56 (Win64) OpenSSL/1.1.1t PHP/8.0.28, Database client version: libmysql - mysqld 8.0.28, PHP extension: mysqli curl mbstring, PHP version: 8.0.28). The "piyushshop" database is highlighted with a red box.

The tables inside the database should also be visible:

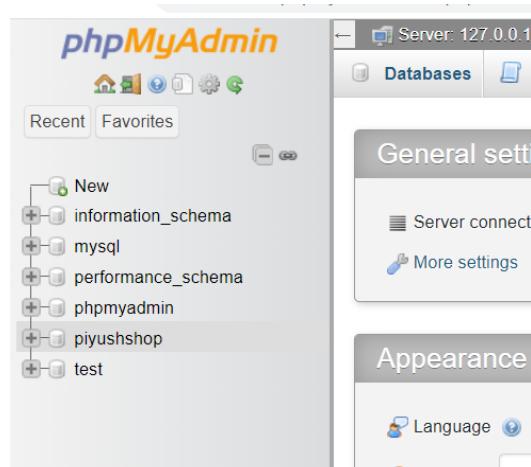

The screenshot shows the phpMyAdmin interface on a Windows 7 desktop. The title bar says "localhost / 127.0.0.1 / piyushshop | +". The left sidebar lists databases: New, information_schema, mysql, performance_schema, phpmyadmin, piyushshop, New, contactus, inventory, and orders. The main content area shows the "Structure" tab for the "inventory" table in the "piyushshop" database. The SQL query at the top is "SELECT * FROM `inventory`". Below it, there's a table with columns id, p1, p2, p3, p4, p5, p6, p7, p8, p9, p10, p11, p12, p13, p14, p15, p16, p17, p18. The table has 18 rows, all of which have the value 1000. At the bottom, there are buttons for Print, Copy to clipboard, Export, Display chart, and Create view.

Note: The inventory is set to 1000 items each while the other tables are currently empty.

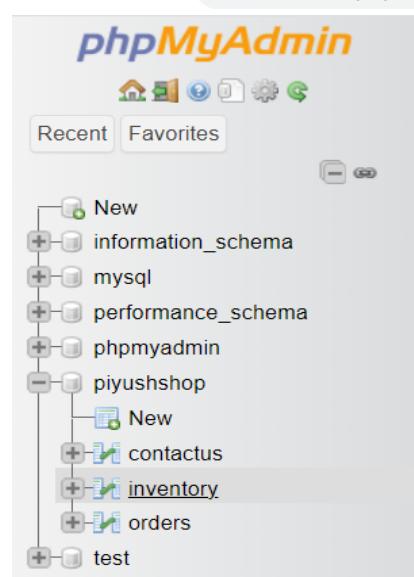

Changing the inventory values

1. You can view the table inventory by opening phpMyAdmin and following these steps:

In the tab on the left click the + icon beside ‘piyushshop’

Click on ‘inventory’

Inventory table is now visible, the preset values are all 1000.

	id	p1	p2	p3	p4	p5	p6	p7	p8	p9	p10	p11	p12	p13	p14	p15	p16	p17	p18
	1	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000

2. To change this you can delete this value and add a new one.

First click the Delete button beside the field.

	id	p1	p2	p3	p4	p5	p6	p7	p8	p9	p10	p11	p12	p13	p14	p15	p16	p17	p18
	1	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000	1000

This will clear out this field.

3. Click on 'SQL' on the top bar

The screenshot shows the phpMyAdmin interface with the following details:
- Top bar: Server: 127.0.0.1, Database: piyushshop, Table: inventory.
- Navigation bar: Browse, Structure, SQL, Search, Insert, Export, Import, Privileges, Operations, Triggers.

4. Paste the following command while changing the respective inventory numbers:

```
INSERT INTO `inventory`(`id`, `p1`, `p2`, `p3`, `p4`, `p5`,  

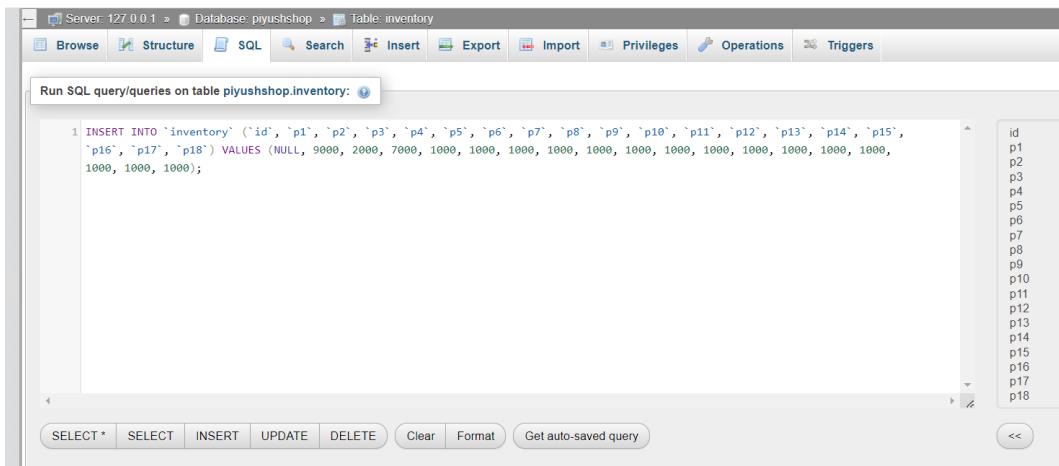

`p6`, `p7`, `p8`, `p9`, `p10`, `p11`, `p12`, `p13`, `p14`, `p15`,  

`p16`, `p17`, `p18`) VALUES (NULL, 1000, 1000, 1000, 1000,  

1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000,  

1000, 1000, 1000);
```

For example here the first 3 values were changed to 9000,2000 and 7000:

The screenshot shows the MySQL Workbench interface with the following details:

- Server:** 127.0.0.1
- Database:** piyushshop
- Table:** inventory
- SQL Editor Content:**

```
1 INSERT INTO `inventory`(`id`, `p1`, `p2`, `p3`, `p4`, `p5`, `p6`, `p7`, `p8`, `p9`, `p10`, `p11`, `p12`, `p13`, `p14`, `p15`, `p16`, `p17`, `p18`) VALUES (NULL, 9000, 2000, 7000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000);
```
- Column List:** A vertical list of columns from the inventory table: id, p1, p2, p3, p4, p5, p6, p7, p8, p9, p10, p11, p12, p13, p14, p15, p16, p17, p18.
- Toolbar:** Includes buttons for Browse, Structure, SQL, Search, Insert, Export, Import, Privileges, Operations, and Triggers.
- Bottom Buttons:** SELECT *, INSERT, UPDATE, DELETE, Clear, Format, Get auto-saved query.

5. Click on Go in the bottom right corner.

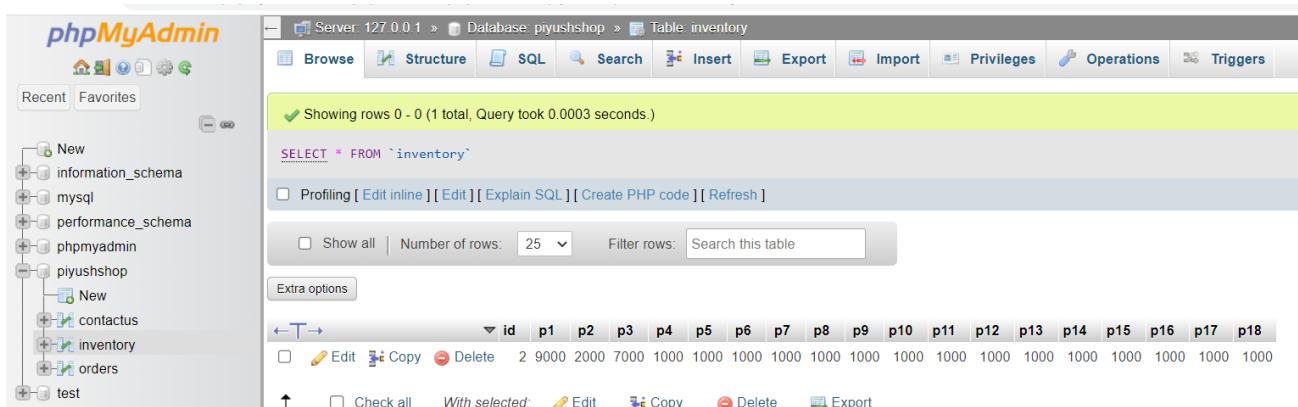

The following screen should appear.

The screenshot shows the phpMyAdmin interface for the 'piyushshop' database. The 'inventory' table is selected. A success message at the top states '1 row inserted.' Below it, the SQL query is displayed:

```
INSERT INTO `inventory` (`id`, `p1`, `p2`, `p3`, `p4`, `p5`, `p6`, `p7`, `p8`, `p9`, `p10`, `p11`, `p12`, `p13`, `p14`, `p15`, `p16`, `p17`, `p18`) VALUES (NULL, 9000, 2000, 7000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000, 1000);
```

You can go back to the inventory to see it's updated

The screenshot shows the phpMyAdmin interface for the 'piyushshop' database. The 'inventory' table is selected. A success message at the top states 'Showing rows 0 - 0 (1 total, Query took 0.0003 seconds.)'. Below it, the SQL query is displayed:

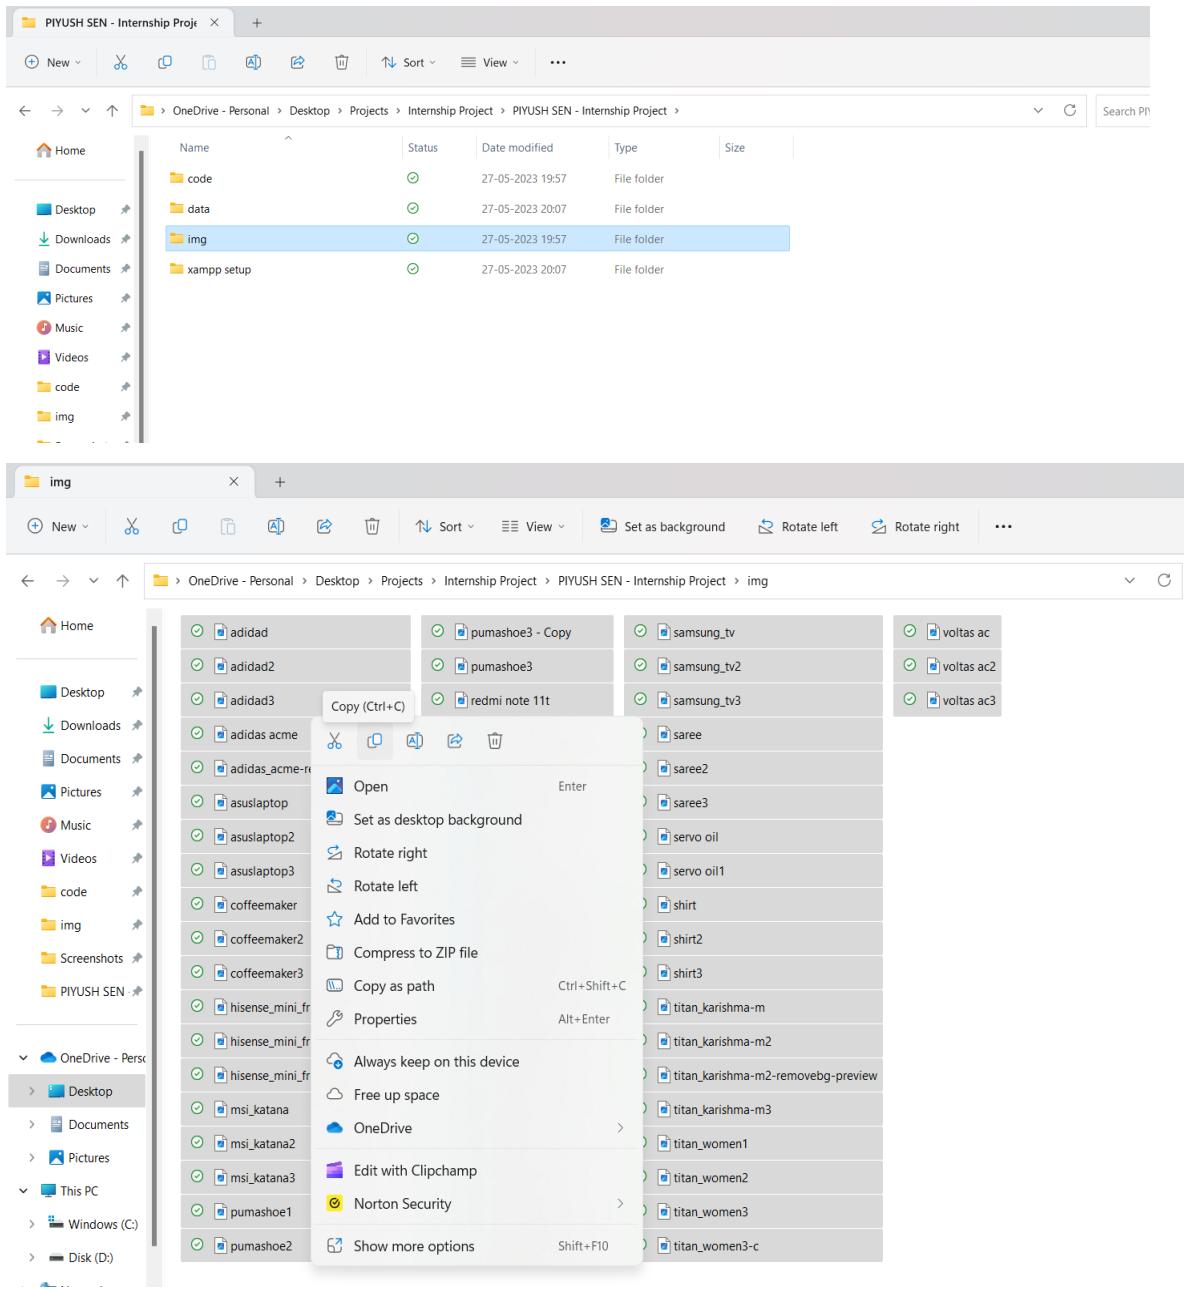

```
SELECT * FROM `inventory`
```

The results table shows one row of data:

	<input type="checkbox"/>																	
	<input type="checkbox"/>																	
1	<input type="checkbox"/>																	

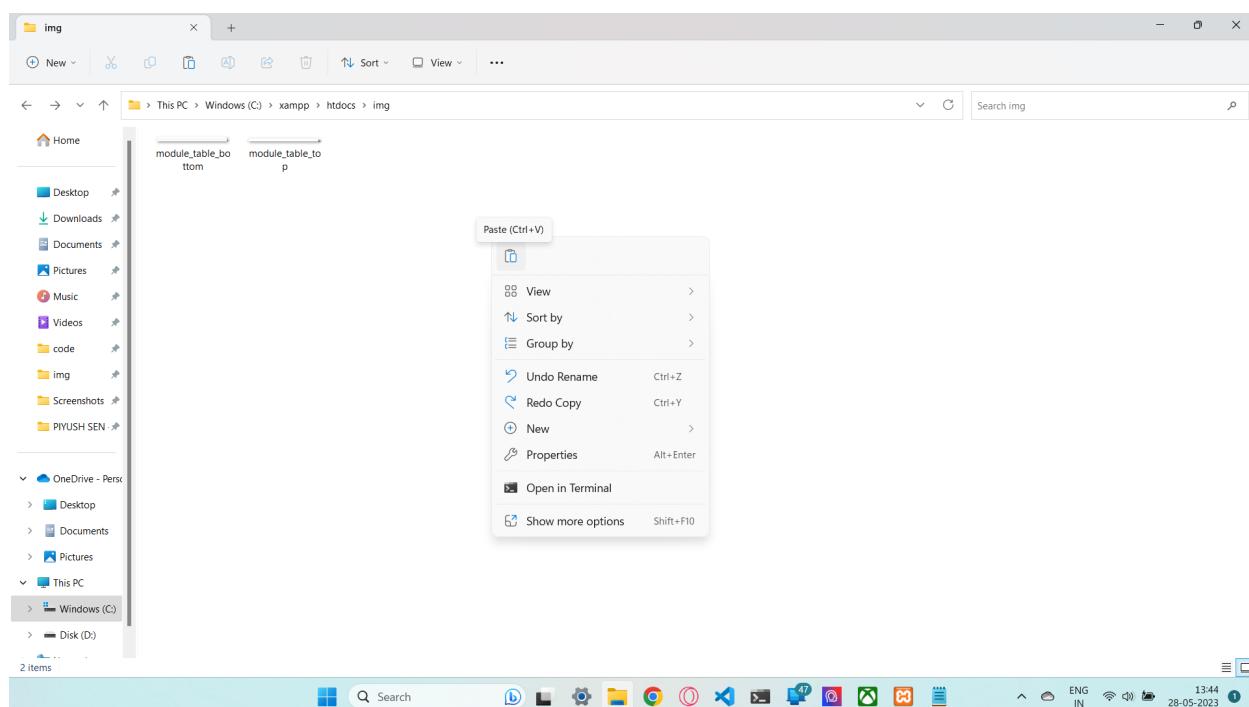

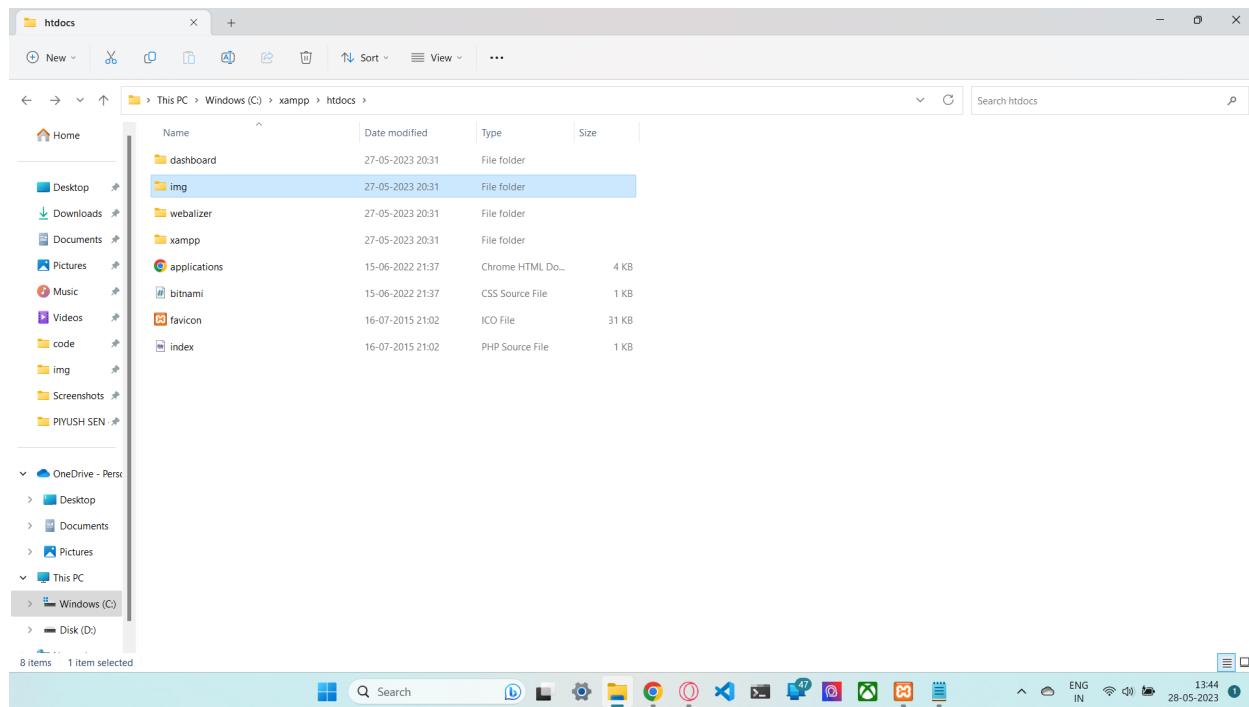

Website setup

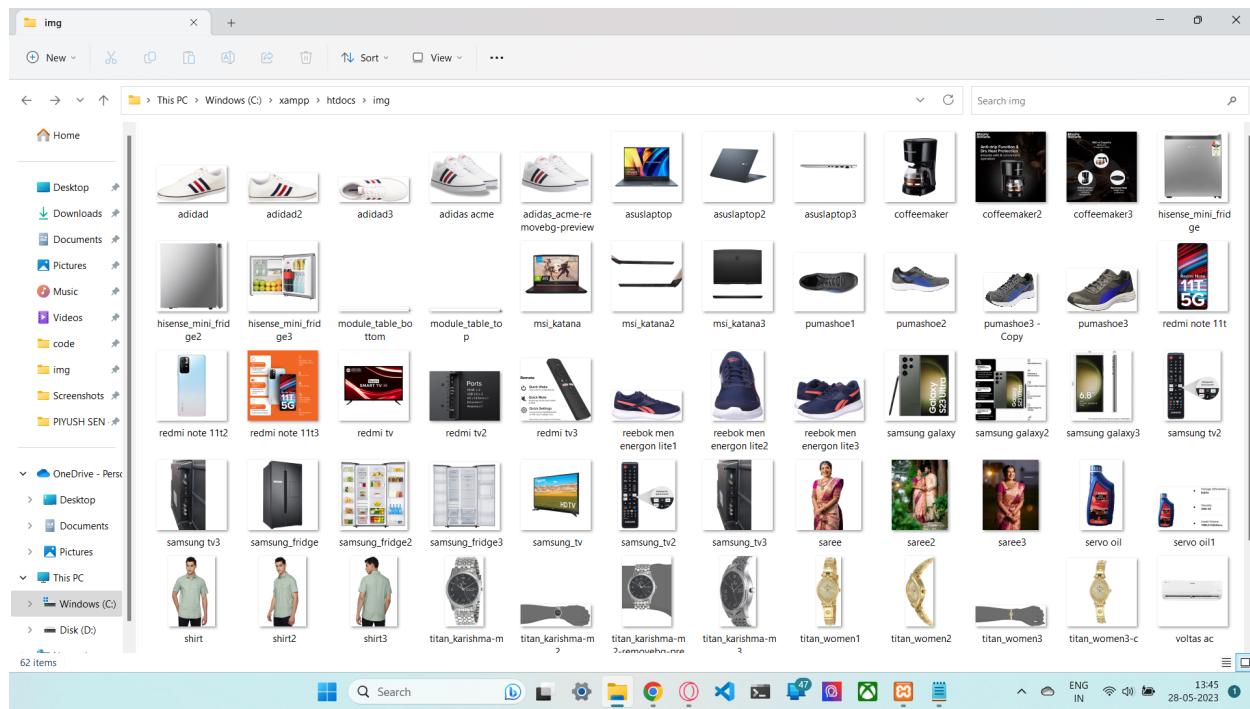

1. Open the folder 'img' in the project folder and copy it's entire content.

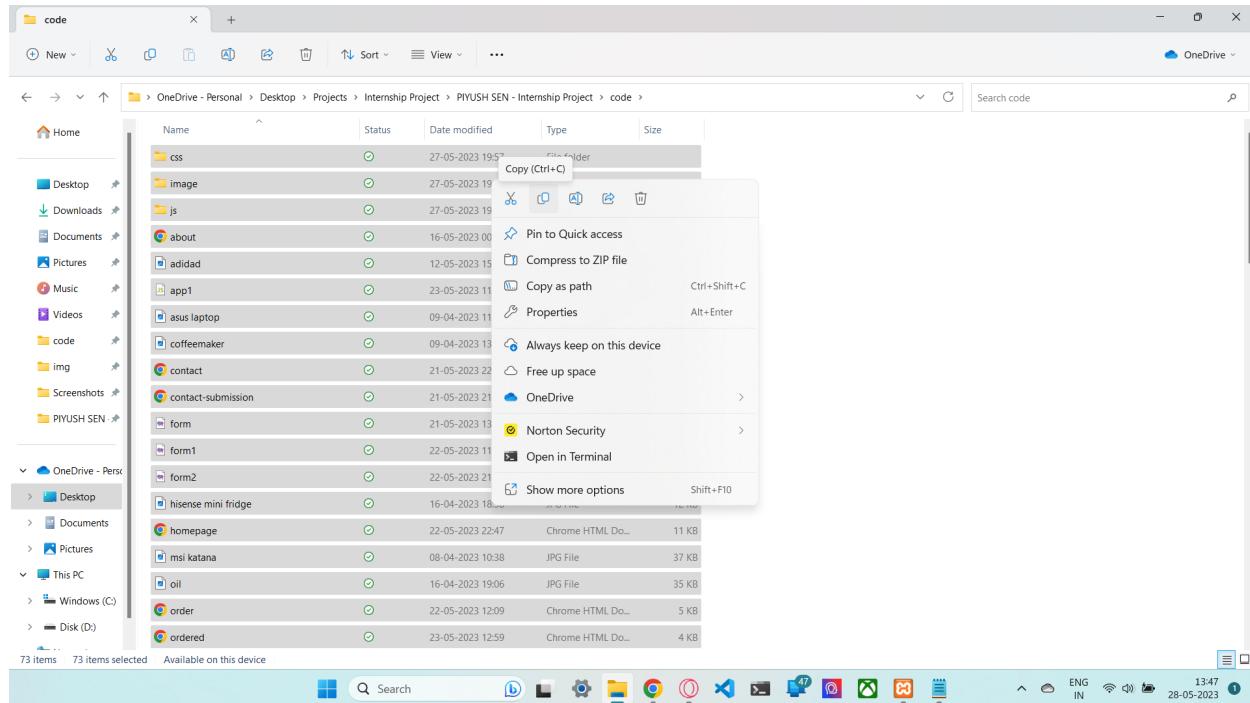

2. Navigate to the xampp folder (where xampp was installed, (automatically in C:\xampp)) and open the folder ‘htdocs’ and then open ‘img’ and Paste the contents.

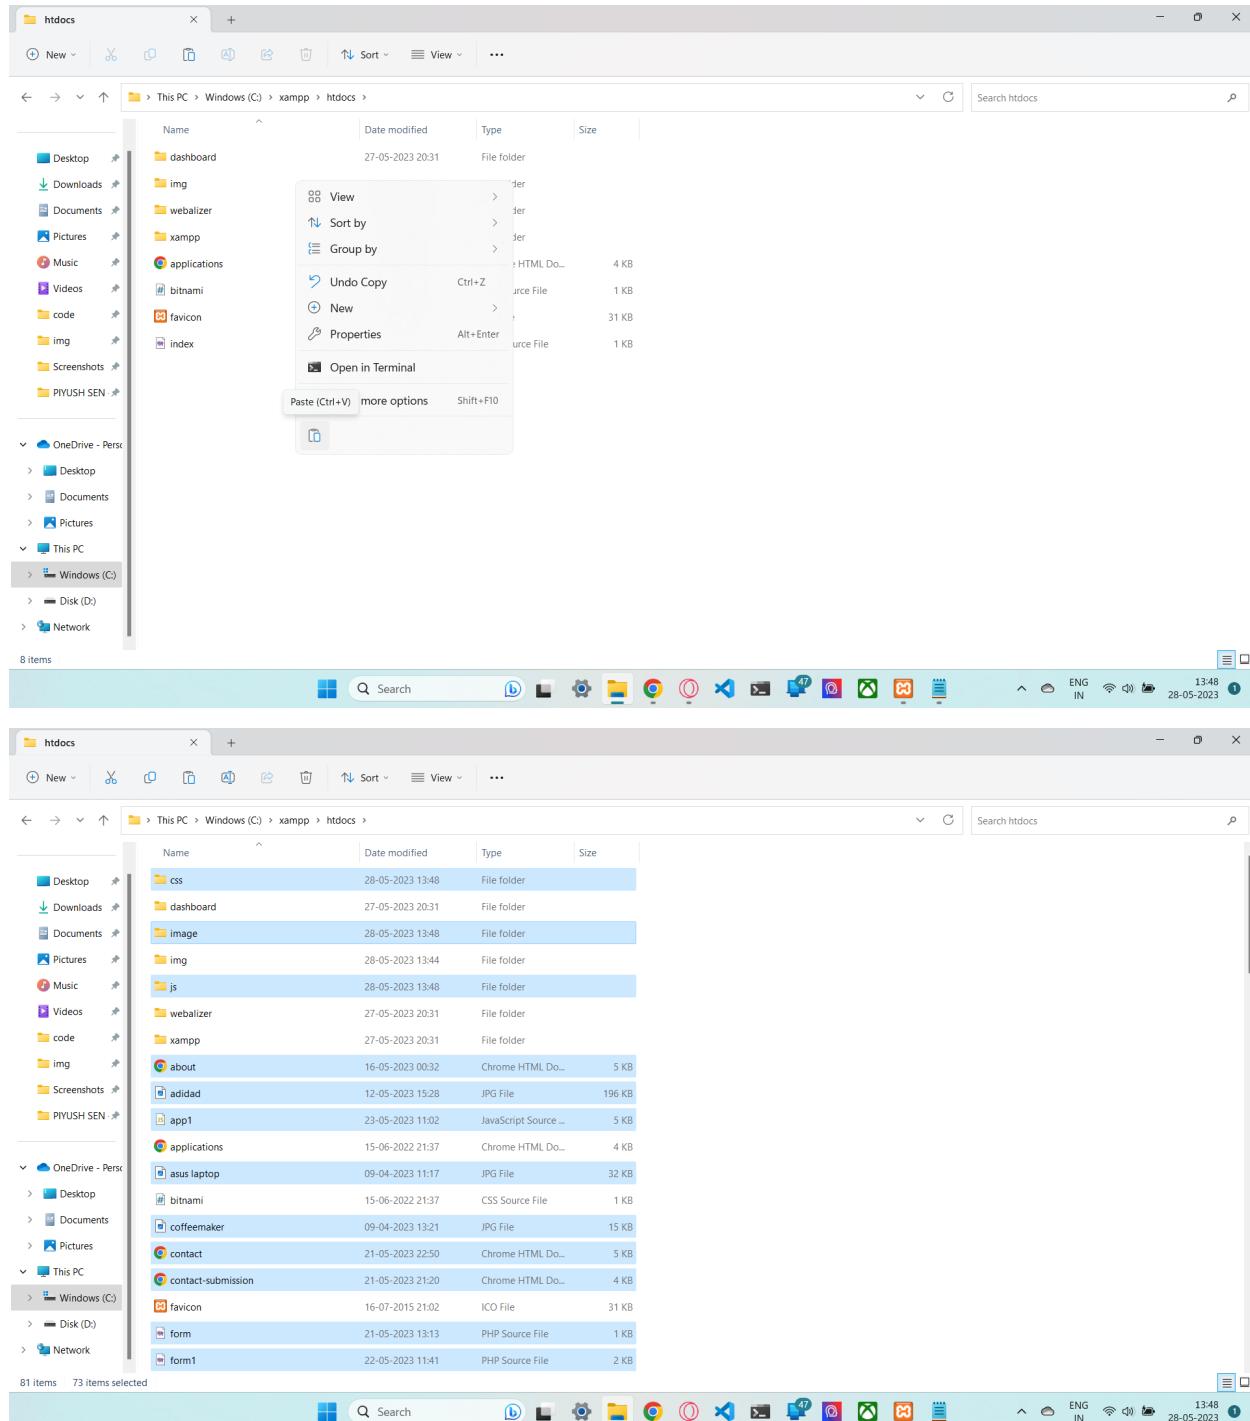

3. Now Navigate back to the project folder and copy the contents of the folder 'code'.

4. Navigate to 'htdocs' inside the xampp folder once again and Paste the contents.

The website should now be functional.

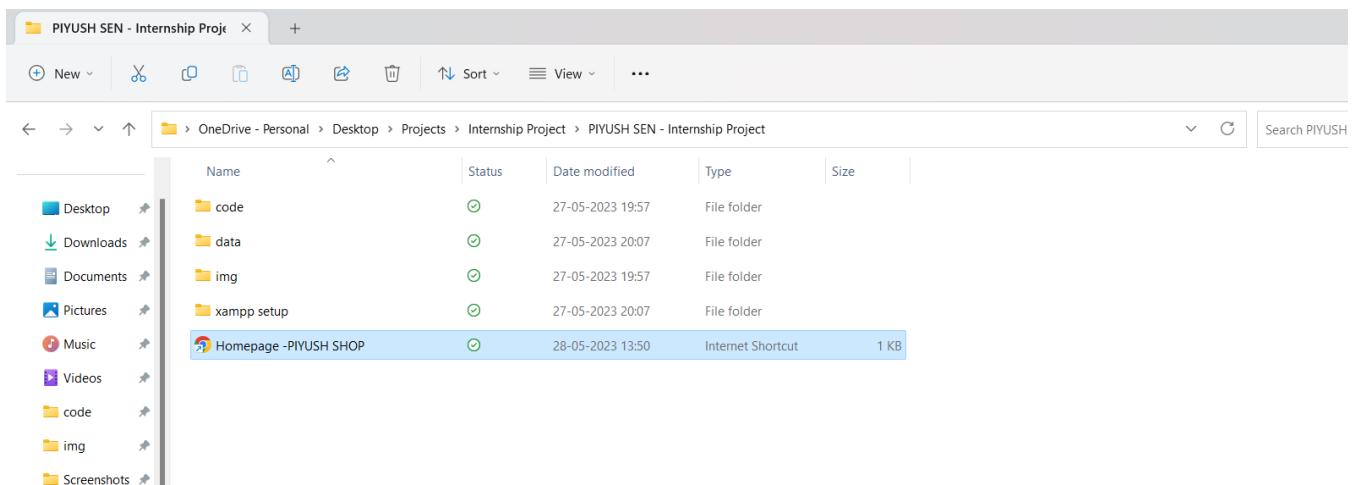

You can open it by first starting Apache and MySQL module in XAMPP control panel first

Then by clicking on this link: <http://localhost/homepage.html>

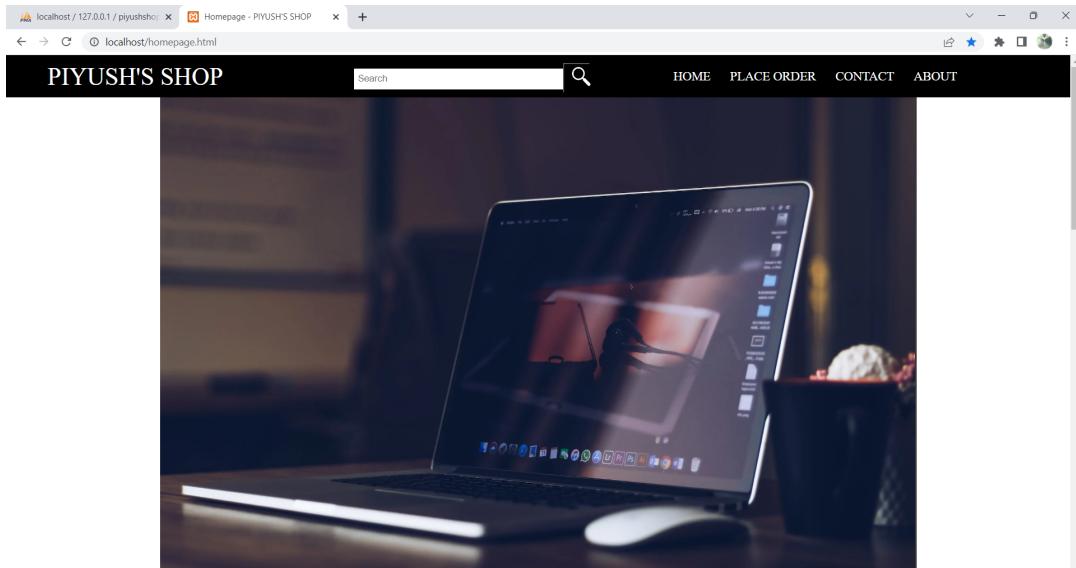

OR

The shortcut created in the project page

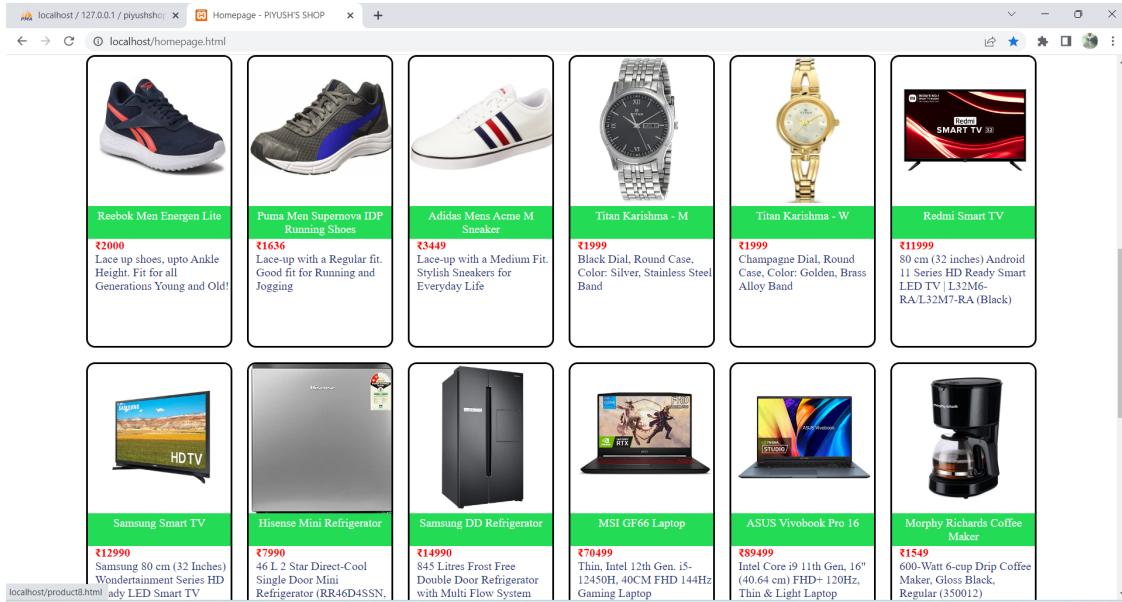

Navigating the website

1. Open the website.

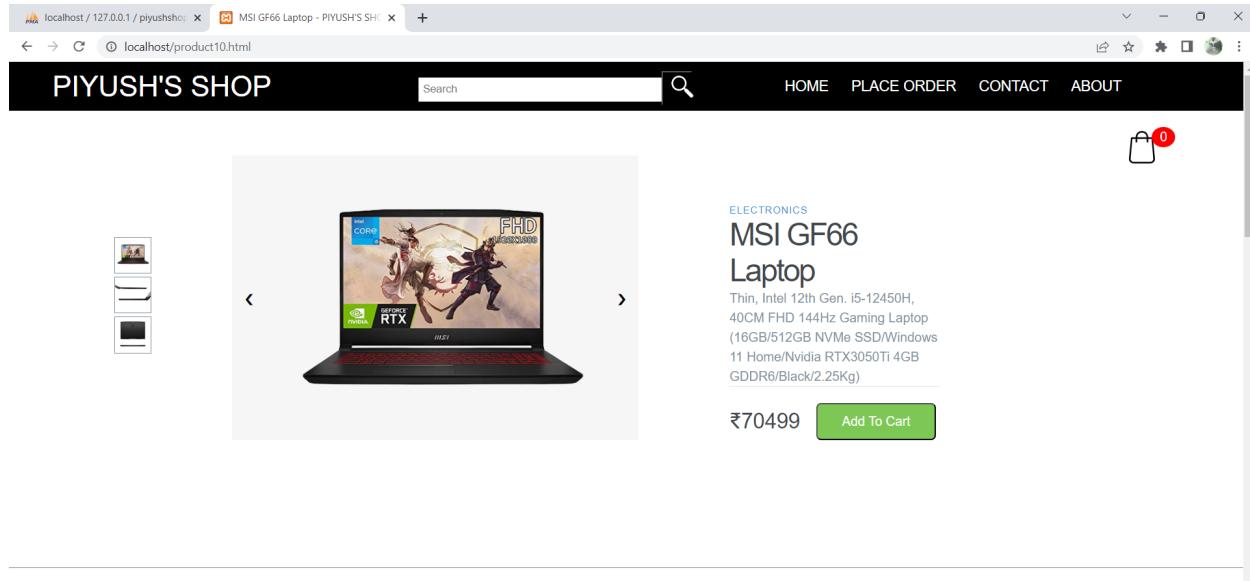

2. Scroll down and click on the product you want to view.

A shopping cart icon in the top right corner shows a red notification with the number 6.

10. The Place order page appears, fill in the delivery address and details. Then click ‘PROCEED TO PAYMENT’. (You can also change the quantities of the products on the tab on the right)

11. The Payment options window appears.

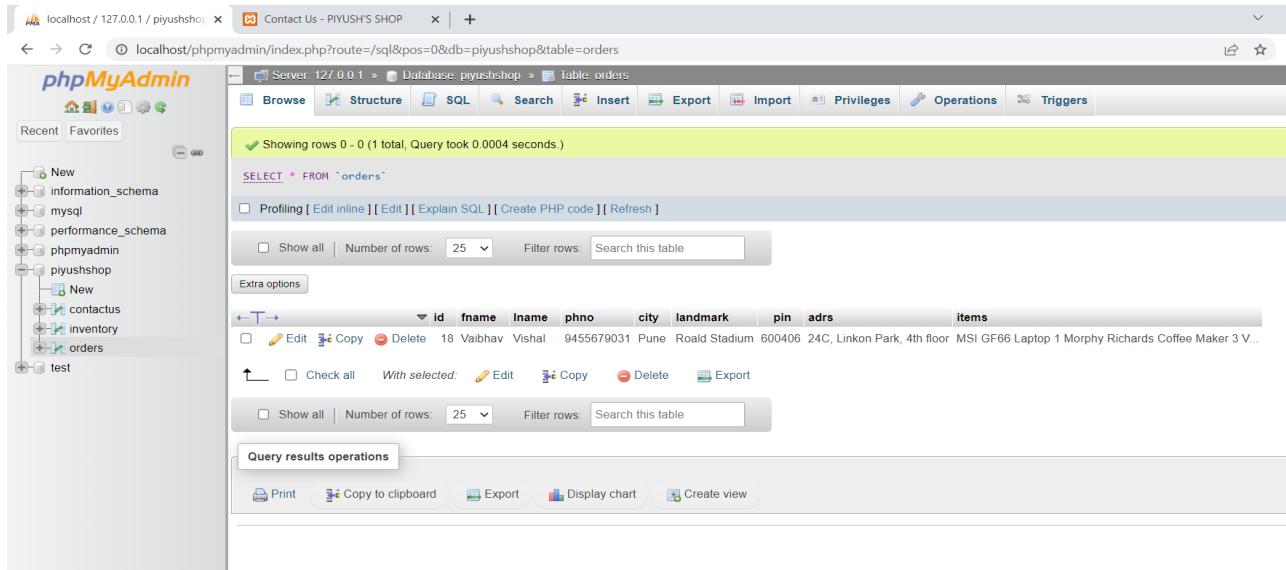

12. Click on any of the payment options. (It isn't connected to an actual payment option).
13. The following screens appear

The image contains three screenshots from a Windows desktop environment. The top screenshot shows a browser window titled 'Payment Successful!' with the URL 'localhost/payment-successful.html'. It displays a large green checkmark icon and the text 'Your Payment was Successful!' followed by 'Redirecting to client website'. The middle screenshot shows another browser window titled 'Order Placed Successfully!' with the URL 'localhost/ordered.html'. It features a logo for 'PIYUSH'S SHOP' and a message 'Your order has been placed successfully!'. The bottom screenshot shows a screenshot of the desktop taskbar, which includes icons for various applications like File Explorer, Task View, and Control Panel, along with system status indicators for battery level, signal strength, and date/time (28-05-2023, 16:25).

The order is complete!

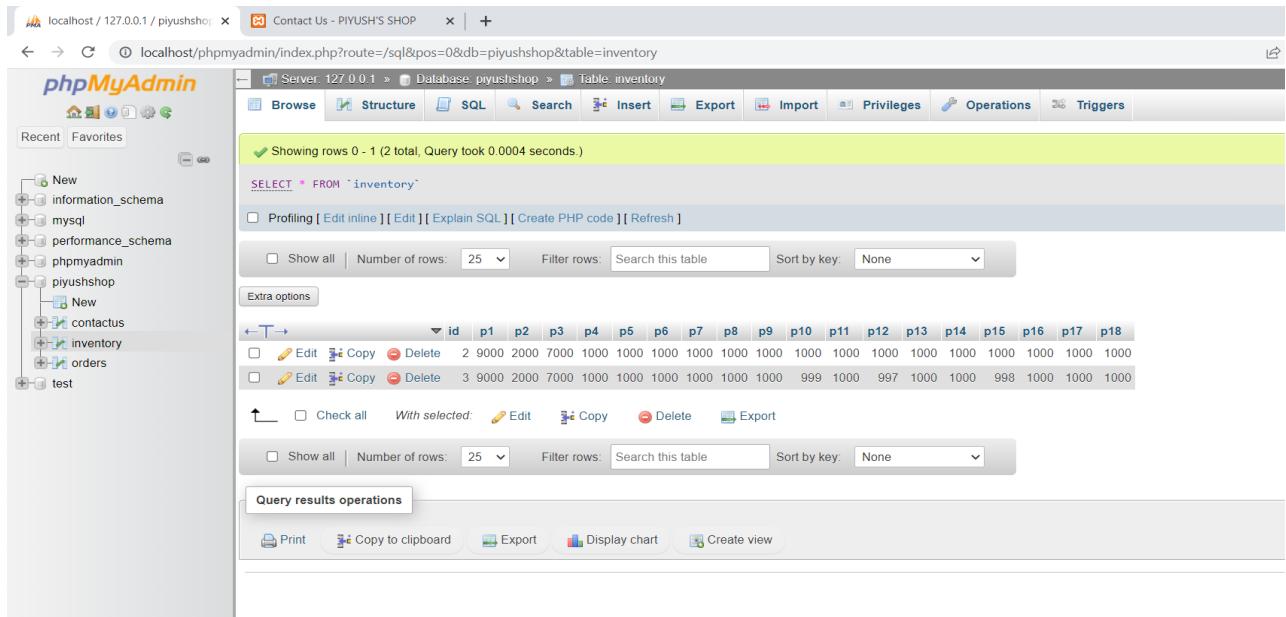

You can check the order and inventory table in phpMyAdmin after placing the order, they are updated.

Orders Table

The screenshot shows the phpMyAdmin interface for the 'orders' table in the 'piyushshop' database. The table has columns: id, fname, lname, phno, city, landmark, pin, and adr. One row is visible with values: id=18, fname='Vaibhav', lname='Vishal', phno='9455679031', city='Pune', landmark='Roald Stadium', pin='600406', and adr='24C, Linkon Park, 4th floor MSI GF66 Laptop 1 Morphy Richards Coffee Maker 3 V...'. Navigation buttons like 'Edit', 'Copy', 'Delete', and 'Export' are present.

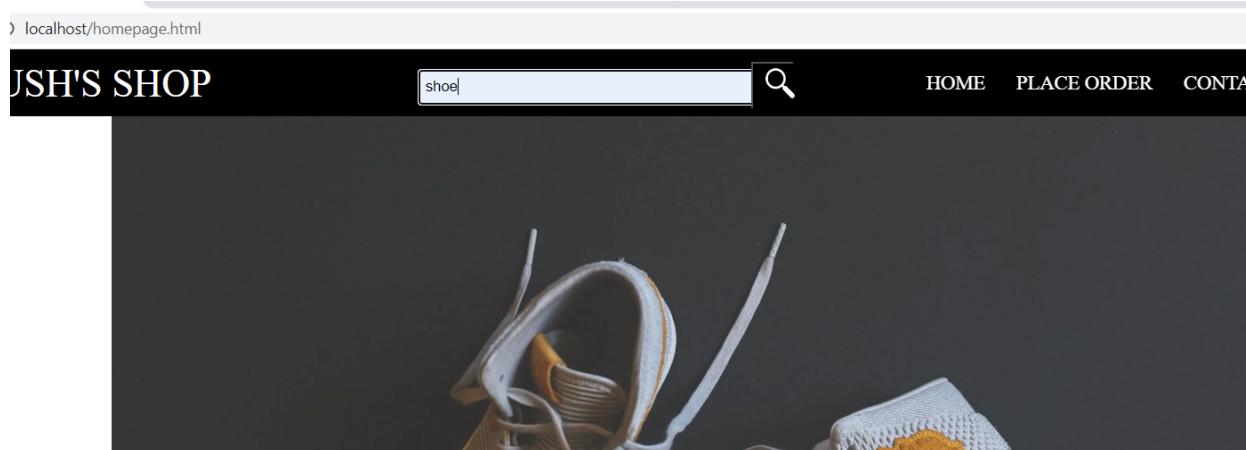

Inventory Table

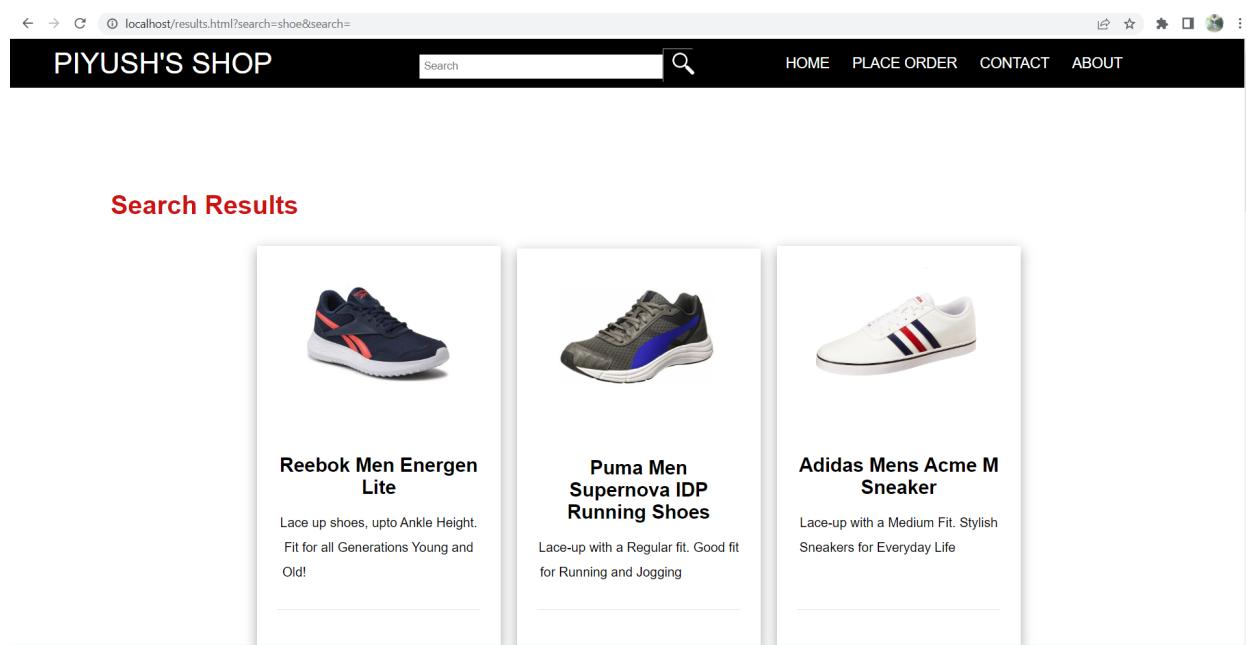

The screenshot shows the phpMyAdmin interface for the 'inventory' table in the 'piyushshop' database. The table has columns: id, p1, p2, p3, p4, p5, p6, p7, p8, p9, p10, p11, p12, p13, p14, p15, p16, p17, and p18. Two rows are visible with values: row 1 (id=2) has p1=9000, p2=2000, p3=7000, p4=1000, p5=1000, p6=1000, p7=1000, p8=1000, p9=1000, p10=1000, p11=1000, p12=1000, p13=1000, p14=1000, p15=1000, p16=1000, p17=1000, p18=1000; row 2 (id=3) has p1=9000, p2=2000, p3=7000, p4=1000, p5=1000, p6=1000, p7=1000, p8=1000, p9=1000, p10=1000, p11=999, p12=1000, p13=997, p14=1000, p15=1000, p16=998, p17=1000, p18=1000. Navigation buttons like 'Edit', 'Copy', 'Delete', and 'Export' are present.

Searching

1. On any page type in the what you want to search in the search box on the top bar and press the  button, if the thing you type in matches the search keywords then the respective product will be shown.
For example, 'shoe' is typed in

All the shoes show up

Search Results

Reebok Men Energen Lite

Lace up shoes, upto Ankle Height.
Fit for all Generations Young and Old!

Puma Men Supernova IDP Running Shoes

Lace-up with a Regular fit. Good fit for Running and Jogging

Adidas Mens Acme M Sneaker

Lace-up with a Medium Fit. Stylish Sneakers for Everyday Life

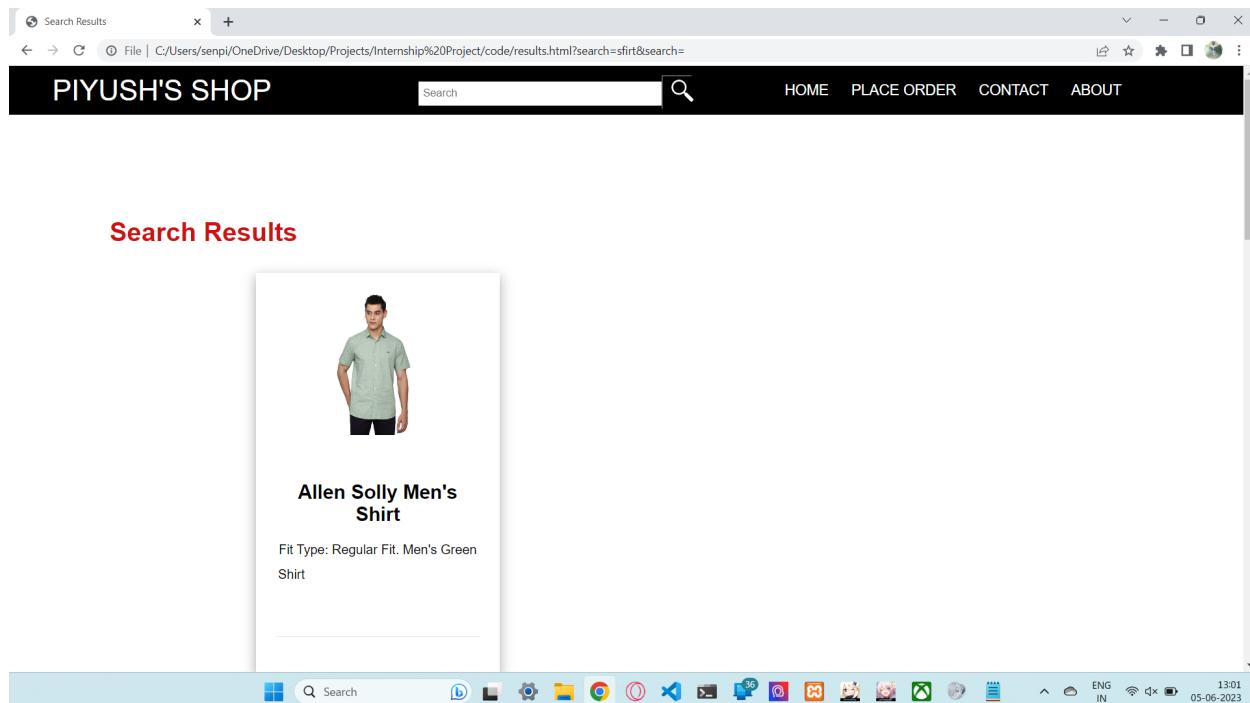

Searching with Errors

The website accepts the following errors in search

1. One letter was exchanged with another next to it. Examples- ‘fridge’ to ‘frideg’ and ‘clothes’ to ‘ctlohes’.
2. Letter being misplaced with another. The number of such letters depends on the length of the word:
 - If the word is 2-5 letters, One error is accepted (shirt->sfirt).
 - If the word is 6-7 letters, Two errors are accepted (coffee->cofeez).
 - If the word is 7 letters or higher, Three errors are accepted (vivobook->zivoloow).

You can search and still get results if your errors are within these limitations:

Searched ‘sfirt’

Searched ‘cofeeze’

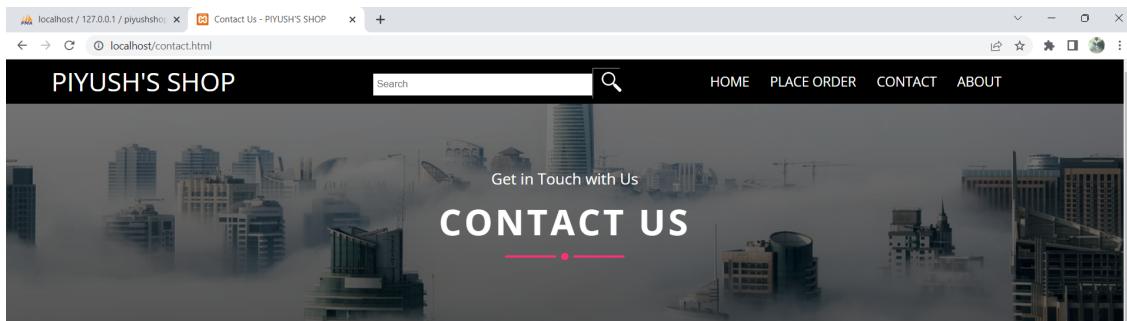

The screenshot shows a Windows desktop environment with a web browser window open. The browser title bar says 'Search Results'. The address bar shows the URL: C:/Users/senpi/Desktop/Projects/internship%20Project/code/results.html?search=cofeeze&search=. The main content area of the browser displays the 'PIYUSH'S SHOP' website. At the top of the site's header is a navigation menu with links for HOME, PLACE ORDER, CONTACT, and ABOUT. Below the header, the page title 'Search Results' is displayed in red. A product card for a 'Morphy Richards Coffee Maker' is shown, featuring an image of the coffee maker, the brand name, and a brief description: '600-Watt 6-cup Drip Coffee Maker, Gloss Black, Regular (350012)'. The taskbar at the bottom of the screen shows various pinned icons and the system tray with date and time information.

Searched ‘zivoloow’

The screenshot shows a Windows desktop environment with a web browser window open. The browser title bar says 'Search Results'. The address bar shows the URL: C:/Users/senpi/Desktop/Projects/internship%20Project/code/results.html?search=zivoloow&search=. The main content area of the browser displays the 'PIYUSH'S SHOP' website. At the top of the site's header is a navigation menu with links for HOME, PLACE ORDER, CONTACT, and ABOUT. Below the header, the page title 'Search Results' is displayed in red. A product card for an 'ASUS Vivobook Pro 16' is shown, featuring an image of the laptop, the brand name, model, and a brief description: 'Intel Core i9 11th Gen, 16inch (40.64 cm) FHD+ 120Hz, Thin & Light Laptop (16GB/512GB SSD/4GB RTX 3050)'. The taskbar at the bottom of the screen shows various pinned icons and the system tray with date and time information.

2. Fill in the details and click 'SUBMIT'

Screenshot of a web browser showing a contact form for "PIYUSH'S SHOP".

The browser title bar reads "localhost / 127.0.0.1 / piyushshop" and the page title is "Contact Us - PIYUSH'S SHOP".

The contact form fields include:

- Name: Vaibhav (in blue box)
- Name: Vishal (in blue box)
- Email: vaibhavvishal2003@yahoo.com (in blue box)
- Phone: 9455679031 (in blue box)
- Message: Good job!
- Submit button (pink)

The browser status bar shows the URL "localhost/contact.html", the IP "44", and the time "Monday - Friday (9:00 AM IST to 6:00 PM IST)".

A decorative illustration of a customer service representative wearing a headset and working on a laptop, surrounded by communication icons (phone, email, message bubbles), is displayed on the right side of the form.

The taskbar at the bottom of the screen shows the application "PIYUSH'S SHOP" is active. Other icons visible include the Start button, Search, Task View, Settings, File Explorer, Google Chrome, and various system icons. The date and time are shown as "28-05-2023 16:26".

Accessibility
The website must be easily available for anyone who searches for it and also should look friendly to anyone visiting.

Ease of use
Our customers should be able to use the website without any confusion. They should be able to understand where to find any feature that we provide and buy whatever they want to.

Payment friendly
We have made the ordering and payment procedure as simple as possible so that customers can use whichever payment method they want with utmost ease.

Beautification
The pages are made as pleasant to the eye as possible taking feedback of hundreds of people. This makes browsing more friendly and brightens your mood.
